Additional Instructions:

None

Q1. **Project Title:** Building a Inline styles in JSX.

Problem Statement

You are tasked with creating a simple web application to demonstrate the use of inline styles in JSX. Your application should render a web page with the following requirements:

There should be a heading element (<h1>) with the text "Inline Style in JSX Example." The heading text should have a green color.

Inside a div element, there should be a paragraph (<p>) with the text "This is a paragraph with inline styles applied." The paragraph should have the following inline styles applied:

Text color should be 'darkblue.'
Font size should be '16px.'
The div element itself should have the following inline styles applied:

Background color should be 'lightblue.'
Text color should be 'darkblue.'
Padding should be '10px.'
A border with the style '1px solid blue.'
A border radius of '5px.'

You need to create a React component named App that renders the above structure and styles using JSX and inline styles.

Tech Stack:

- React
- CSS

PORT

- 8081

Platform Instructions:

Step1:

Open the terminal and enter the below command
nmv use 14

Step2:

Use "cd reactapp" command to go inside the reactapp folder.
Install Node Modules - "npm install"

Step3:
